

Considering designing a network audio system?

Axis Audio Design Service is your key to designing, proposing and selling Axis network audio.

Whether you're an audio professional or new to audio and want to begin offering it as part of your complete security and business solutions, we'll design an Axis network audio system to help solve your clients' needs.

About the service

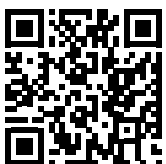

- > Using state-of-the-art acoustic simulation software, we'll deliver a complete Axis network audio design for you to propose to your client
- > You will receive a helpful report including: speaker type, number of speakers, speaker layout, mounting height and heat maps illustrating dB coverage

What are the benefits?

- > Consultative design and proposal assistance from an Axis Solutions Engineer
- > Increased revenue by adding audio to your proposal
- > Complimentary consultation and design for most projects
- > Easier installation with a plan
- > Enhanced customer experience

How to get started

- > Visit: www.axis.com/audiodesignservice
- > Add your contact information in the online field boxes and click submit
- > You will receive an email with a link to download our Network Audio Site Survey Form
- > An Axis representative will be in touch soon to request your completed form and floor plans, confirm details, and get started on your plan
